

Question Paper

1. What is Machine Learning? Explain its types. [5M]
2. How do you address overfitting? Mention some ways to avoid it. [5M]
3. Explain Reinforcement Learning and its real-life uses. [10M]
4. How important is Data preprocessing? Does the model behave the same in good and bad data? Explain in your own words. [10M]
5. What is NLP? How Important are Embeddings? [10M]
6. When and when not to use Machine Learning? Explain. [10M]
